

Burwood Environment Committee

The Burwood Girls High School Environment Committee is an active, engaged group of passionate students, with an aim to inspire interest and educate the entire school community in all things green.

In order to further Burwood Girls High School's mission for a sustainable campus, our Environment Committee intends to undertake a comprehensive waste audit of our school.

This audit will form the basis of an Environmental Management System which will enable the school to fully understand and manage its impact on its immediate environment as well as the school's broader contribution to greenhouse gas emissions and climate change.

The committee will be involved in designing and implementing changes in waste management practices to minimise the school's waste output. Activities for students will involve measuring waste volumes, designing waste avoidance campaigns, and managing systems for alternative waste streams such as composting.

The Environment Committee is coordinated by Ms Di Maio and Mr Butler, with meetings scheduled for Mondays A week, lunch time in Room 38. Meeting times are posted for students on Sentral.
